Total Customers by Tenure

INSIGHTS

- Germany holds **Critical High (0.96%)** and **High (7.69%)** exit risk despite only 25% customer share
- Developing customers are active with **2 products** but under **4 years** tenure — highest conversion potential to Committed with early engagement
- Committed customers carry predominantly Low exit risk
- Passive Multi Product customers churn at **90.22%** - strongest churn signal in the dataset
- 37.61%** of High Risk customers are Early Stage — new customers are disengaging before building loyalty
- High balance + Early Stage + Product Heavy + Premium** are most prone to exit risk

Risk Category	Total Customer	Exited Customer	Churn Rate
Critical High	28	28	100.00%
High	327	298	91.13%
Medium	3106	1204	38.76%
Low	6539	507	7.75%
Total	10000	2037	20.37%

RETENTION RECOMMENDATIONS

- Prioritise **inactive + high balance** customers — outreach before they exit
- Germany needs a dedicated retention strategy — service quality and product fit review
- Customers with **3+ products** need immediate portfolio review — over-selling is driving churn
- Female churn (**25.07%**) significantly exceeds male (**16.46%**) — review product relevance and service experience by gender
- Strengthen Early Stage onboarding — **37.61%** of High Risk customers are new customers
- Tenure, salary, and credit score show no churn variation — do not prioritise these in retention efforts
